## CONDITIONS OF SALE

---

1. The Cattle will be exposed separately according to the numbers in the following Catalogue. The Auctioneers reserve the right to refuse any bid without assigning any reason. The highest offerer of each lot will be preferred to the purchase (subject to Article 3)—each offer exceeding the former by at least one guinea. All entries must be clearly tattooed in the ear with their correct tattoo letters and numbers in accordance with the Regulations of the Shorthorn Society, and any animal found not being so tattooed will be reported to the Directors of the Scottish Shorthorn Breeders' Association, and such animal may be rejected from the Show and Sale. Twins must be so described, also whether twin with a bull or heifer.
2. The pedigree of each animal is guaranteed to be correct and registered or accepted for registration in Coates' Herd Book by the person whose name appears as the Exposer, but every animal is sold subject to all faults otherwise, with the exception that if a bull has only one Testicle down, the Owner must make intimation to this effect in the Catalogue. No liability whatever is undertaken by the Auctioneers for the statements appearing in the Catalogue or made at the Sale. The Exposer who supplies such statements is alone responsible for any error or mis-statement. Animals affected with any disease of an infectious nature or animals out of an infected Herd are strictly prohibited from being brought to the premises occupied or used by the Company at the time and should any such be brought, the Owner or Consigner will be held responsible for all damage or loss occasioned thereby.
3. The Exposers reserve the right to fix a reserve price, and to announce same before the bidding begins or during the time of the bidding or at the conclusion thereof. The right to bid by or on behalf of the Seller in terms of the Sale of Goods Act, 1893, is expressly reserved. Every animal must be the *bona fide* property of the Exposer at the time of Sale.
4. Immediately after each purchase is declared, the risk of the animal shall be exclusively with the Buyer, and it is declared that until a settlement shall be made in terms of these Conditions the delivery of the animal shall be suspended. The right of property shall not pass until the price is paid.
5. Immediately after the Sale all lots must be paid for in cash to the Auctioneers. The price being paid, each lot shall be taken away at the Buyer's expense within one day after the Sale thereof. Lots shall only be removable from the Auctioneers' possession on a written order from their clerk, and any lot removed in contravention of this condition may be recovered *brevi manu* by the Auctioneers.
6. Should any buyer fail to pay for and remove his purchase in compliance with the above Conditions, the Auctioneers in their option may either (a) sue the Buyer for the price and interest thereon at the rate of *Six per Centum*

*per Annum* and for the keep of, and any other expense incurred by them in connection with such purchase, or (b) re-sell the Lot either publicly or privately and recover from the defaulting buyer the deficiency (if any) attending such re-sale and interest thereon as aforesaid together with the keep and all other expenses. In either case, the Auctioneers shall have the right to sue at their own instance without the consent of the Owner or Consigner, and no defence whatever in such action shall be competent to the Buyer who shall have recourse against the Owner or Consigner alone.

7. If any animal be sold with the option to "Test," such condition shall not operate to suspend the sale or the passing of the risk but shall have effect only as follows:—

- (a) The condition shall be provable only by entry in the Auctioneers' Sale Roll.
- (b) If the option to re-test is given, the Purchaser may require the Single Intradermal Comparative Test for Tuberculosis. The Purchaser may also require the animal to be submitted to the Agglutination Test for Contagious Abortion at a laboratory approved by the Ministry of Agriculture, Fisheries, and Food, and if a test for Johne's Disease is required, it shall be the Complement Fixation Test for Johne's Disease to be carried out at the Weybridge Laboratory of the Ministry of Agriculture, Fisheries, and Food. Notice in writing of the intention of the Purchaser to carry out such tests must be given to the Auctioneers before, or immediately after, termination of the Sale.
- (c) The test shall be made by a Veterinary Surgeon to be mutually chosen between the Buyer and Seller or, failing their agreement, to be chosen by the Auctioneers.
- (d) The test or tests shall only be made when the animal is (in the opinion of the chosen Veterinary Surgeon) in a fit state for testing and in the case of a test for Tuberculosis on an animal in an Attested Herd, after permission has been obtained from the Ministry of Agriculture, Fisheries, and Food. The time for testing shall be limited to three weeks after Sale, with power, however, to the Auctioneers to extend the period of testing from time to time if they, after hearing the chosen Veterinary Surgeon, deem such extension reasonable, and provided that in the case of the Test for Tuberculosis, it shall only be carried out after an interval of not less than thirty days following any previous Test for Tuberculosis.
- (e) The declaration of the chosen Veterinary Surgeon that the animal has been duly tested and the result of his test shall be final and binding on both Seller and Buyer.
- (f) If the animal be so declared not to have passed the test, the Buyer shall have the right to require the Seller to re-purchase the animal at

the price of the original sale. Such requisition shall be notified in writing to the original Seller, and from the date of receipt of such notice the risk and expense of the animal shall be transferred to him.

- (g) In any case where the option to test is exercised, the Auctioneers shall be entitled to retain the price until the result of the test is declared.  
(h) The expense of any such test or tests shall be borne by the Purchaser.

8. Should an Exposer wish to warrant a bull as being a good server and stock-getter or such other qualified warranty as the Exposer may wish to give, such warranty shall be included and shall form part of the description of the bull as shown in the printed Catalogue. Should a warranty of good service and stock-getter be given, and should it be established subsequent to the Sale that the bull is incapable of service, or while capable of service is incapable of getting stock, a Purchaser shall be entitled, within sixteen weeks from the date of the Sale, to intimate such incapacity to the Vendor, and if such incapacity shall be proved by a Certificate of a Veterinary Surgeon mutually chosen, the Vendor shall be bound to accept delivery of the bull and refund the Purchaser the full purchase price of the bull. To establish a Claim under this condition, the Purchaser must give notice of his claim within sixteen weeks of the Sale. Should the Purchaser and Vendor not agree upon the appointment of a Veterinary Surgeon to examine the bull, the Auctioneers shall appoint a Veterinary Surgeon for this purpose and shall decide by which party the Veterinary Surgeon's fees and expenses shall be paid. In his Certificate the Veterinary Surgeon must state that he has examined the bull, that its impotence or incapacity is not due to injury suffered or illness contracted since the purchase, and that he has also examined the cows or heifers upon which the bull has been tried and found them in a normal breeding state or condition, and he shall give his reasons for declaring the bull ineffective and incapable of getting stock. Notwithstanding the right of the Purchaser to return the bull to the Vendor on the ground of impotency of incapacity, the Vendor shall in no case be liable under this condition for a sum exceeding the amount for which the bull was sold (plus any expenses which may be awarded by the Auctioneers against the Vendor in terms of this paragraph) less its saleable value at the date of the Veterinary Surgeon's Certificate. In respect of bulls purchased for export, no claim under this Article shall be valid unless made prior to the shipment of the bull or within sixteen weeks of the Sale, whichever is the earlier date.

It shall be understood that this guarantee does not operate where a bull from an Attested Herd is sold to go to Non-Attested Premises.

9. All females born after 1st August, 1955, must be certified to have passed the Agglutination Test for Contagious Abortion within three months of date of Sale, or must have been vaccinated. The blood samples for the Agglutination Test must have been taken by a Veterinary Surgeon and submitted by him to an approved laboratory. Animals having passed the test must not, prior to the Show and Sale, come into contact with any animal

that is known to be infected with Contagious Abortion. The entry of any animal which has not passed the Agglutination Test but which has been vaccinated, can only be accepted providing that one of the following certificates (signed by a Veterinary Surgeon) is supplied:—

- (a) That the animal was inoculated with Br. Abortus Vaccine No. 1 (Strain 19) when between four and eight months old and within three years of date of Sale, or
- (b) That the animal having passed the Agglutination Test was then vaccinated within fourteen days with Br. Abortus Vaccine No. 1 (Strain 19) when over eight months old and within three years of date of Sale, or
- (c) That the animal having been previously vaccinated in accordance with either (a) or (b) was re-vaccinated within three years of the previous vaccinations and not more than three years prior to date of Sale.

10. All cows and heifers that are stated in the Catalogue as having been served or artificially inseminated not less than twelve weeks before the date of Sale, or stated as having been running with a bull between dates (the later of which is not less than twelve weeks before date of Sale), will be guaranteed to be in-calf to the service date or between dates and to the bull stated in the Catalogue, unless any alteration is announced at the time of Sale. Heifers which have not had a calf and which are sold unserved shall be so guaranteed. All claims which may be competent under this Condition must be intimated to the Auctioneers within sixteen weeks of the Sale, but in respect of females purchased for export a claim must be made prior to the shipment of the animal or within the said period of sixteen weeks whichever is the earlier date. To establish any claim under this Condition the Purchaser and Vendor shall mutually agree upon a Veterinary Surgeon to examine the animal, and failing agreement a Veterinary Surgeon shall be appointed by the Auctioneers. In his Certificate the Veterinary Surgeon must state that the condition of the animal was not due to any injury or disease contracted since the Sale. Should a claim be established and made as a result of the Veterinary Surgeon's Certificate the Vendor shall be bound to accept delivery of the cow or heifer (as the case may be) and refund to the Purchaser the full purchase price of the animal which shall be at the Vendor's risk and expense as from the date of the notification to the Vendor of the Veterinary Surgeon's decision. Failing agreement between the Vendor and the Purchaser the Auctioneers shall decide by which party the Veterinary Surgeon's fees and expenses shall be paid.

11. No undertaking of the Auctioneers or their servants to take charge of any animal after the Sale or to forward it to its destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of the foregoing conditions.

12. If any dispute—other than (a) a dispute or question relating to the conduct of the Sale and (b) a dispute for the settlement of which provision has been made in terms of these Conditions—shall arise regarding any Shorthorn animal registered in Coates' Herd Book and sold at this Sale, such dispute shall be referred to the Council of the Shorthorn Society of Great Britain and Ireland as sole Arbiters for settlement, and the decision of the Council shall be final and binding on all parties to the dispute.

13. Private Sale. Each animal entered in the Catalogue must be offered for sale by Auction before any private sale shall be allowed or recognised by the Auctioneers. The usual commission must be paid on all animals afterwards sold privately within the premises of the Auctioneers.

14. Without prejudice to the foregoing Conditions of Sale it is hereby expressly declared that the Exposer by selling and the Purchaser by purchasing any animal in terms of the Conditions of Sale shall be bound by the above Conditions of Sale and shall be bound, where a dispute is referred to a Veterinary Surgeon, to accept the verdict or decision of the Veterinary Surgeon as final and binding on both Exposer and Purchaser. Neither party shall have any recourse to law in respect of said dispute otherwise than on the ground of fraud.

15. The Auctioneer is appointed Judge of the Sale, to whom are hereby submitted all disputes and differences of any kind which may arise at and in relation to the Auction, either between Exposers and Offerers or among Offerers themselves. His decision shall be final and binding on all parties.

Calrossie Keynote, red, has been retained at Calrossie. He has scale and character, qualities he inherits from his paternal grand-sires—Bapton Eldorado and Calrossie Highland Leader. His dam is a really good one, being purchased in utero at the Kirkton Dispersal Sale, out of the 1050-guineas Rothes Flower, the dam of such famous sires as Calrossie Hyperbole, Calrossie Christmas Carol, and Calrossie Jacobite (5000 guineas). A sister of this bull, Calrossie Rothes Florence, now in Australia, is the dam of the white, Sydney champion, Greenwich Jedborough, sold to Woomargama Stud, N.S.W., for 4000 guineas.

- (48) BANCHORY PERFECT (11445)—sire, Chapelton Bright Fortune; dam, Banchory Ury Maid 20th by Banchory Kismet.

Banchory Perfect, dark roan, was purchased privately from Mr. Hugh Black for £2000. Low-set and fleshy, with a wonderfully mossy coat, and a great set of legs, he combines the good qualities of the Chapelton Brights and the Kinellar Ury Maids. His sire was reserve for the Calrossie Cup at the Royal English Show in 1956, being purchased jointly for Banchory and Lawton for 3000 guineas. He is by Erimus Fokine (by Kirkton Challenger) out of Bright Blossom by Cruggleton Balmoral. His dam, a grand-milking roan, is by Banchory Kismet (by Bapton Eldorado) from the same Ury Maids as Kinellar Napoleon (8500 guineas). This is his first crop of calves.

- (49) WESTDRUMS BOOMERANG (4468)—sire, Erimus Intrepid; dam, Broadhooks Control Challenge by Kirkton Challenger.

Westdrums Boomerang was bought privately at a high price from Westdrums, and has bred consistently well in the Lanfine Herd, especially females, which are of a very high, uniform quality, and full of character.

- (50) BALDOWRIE BALMORAL (7012), red—sire, Cruggleton Craigton (387100); dam, (416034) Baldowrie Broadhooks Hopeful by Phopachy Hope (381661); g.-dam (322399) Baldowrie Broadhooks by Cruggleton Prince Cecil (336247); 3rd dam, (268929) Rosemount Broadhooks Surprise by Garguston Gladiator (315329); 4th dam, (232350) Ciyna Broadhooks Pride by Collynie Select (293332); 5th dam, (195609) Ranfurly Broadhooks Pride by Garguston Resolute (276947).

Cruggleton Craigon's first bull calf, Baldowrie Repulse, won his class at Perth, and was sold for 2900 guineas to Mr. Walker, Craigeassie. Baldowrie Repulse bred very well in the Craigeassie Herd, and is the sire of many high-priced animals, including the 1956 female champion and the 1957 reserve female champion.

The dam of Baldowrie Balmoral, Baldowrie Broadhooks Hopeful, is adjudged by the experts to be the best female in the herd, and is also the dam of Baldowrie Braemar, sold for 1000 guineas to Col. Dewhurst, Dungarthill.

The extended pedigree of Baldowrie Balmoral is printed above for the benefit of those interested in a sire showing a strong concentration of Cruggleton blood lines, and in this respect Cruggleton Perfect predominates.

Baldowrie Balmoral was chosen to be the senior herd sire by virtue of his tremendous masculine qualities, showing an outstanding head, with very large muscle, and with a wealth of bone and substance. In addition, his pedigree was the best available to follow his very successful predecessor, Kirkton Heir, in whose pedigree Calrossie and Cruggleton blood lines predominate.

**(51) LAWTON DEEP RIVER (5542)—sire, Bapton River Line.**

Lawton Deep River is a son of Bapton River Line, who has bred so well at Lawton. He was purchased for the Baldowrie Herd on account of his great pedigree, his tremendous bone, and wealth of flesh. We are pleased to state that he is passing on all those qualities to his progeny—both males and females alike.

**(52) KIRKTON HEIR (381695)—sire, Kirkton Baronet; dam, Augusta Flora by Naemoor Marshal.**

Kirkton Heir's breeding successes are now well known. In 1955, his sons made the top herd average, and, in addition to Baldowrie Aladdin, he sired Baldowrie Waverley, sold for a high figure, and Baldowrie Clipper Maiden 2nd, the reserve female champion, as well as many other high-priced animals. The daughters of Kirkton Heir who have been retained in the herd are proving to be consistently good breeders.

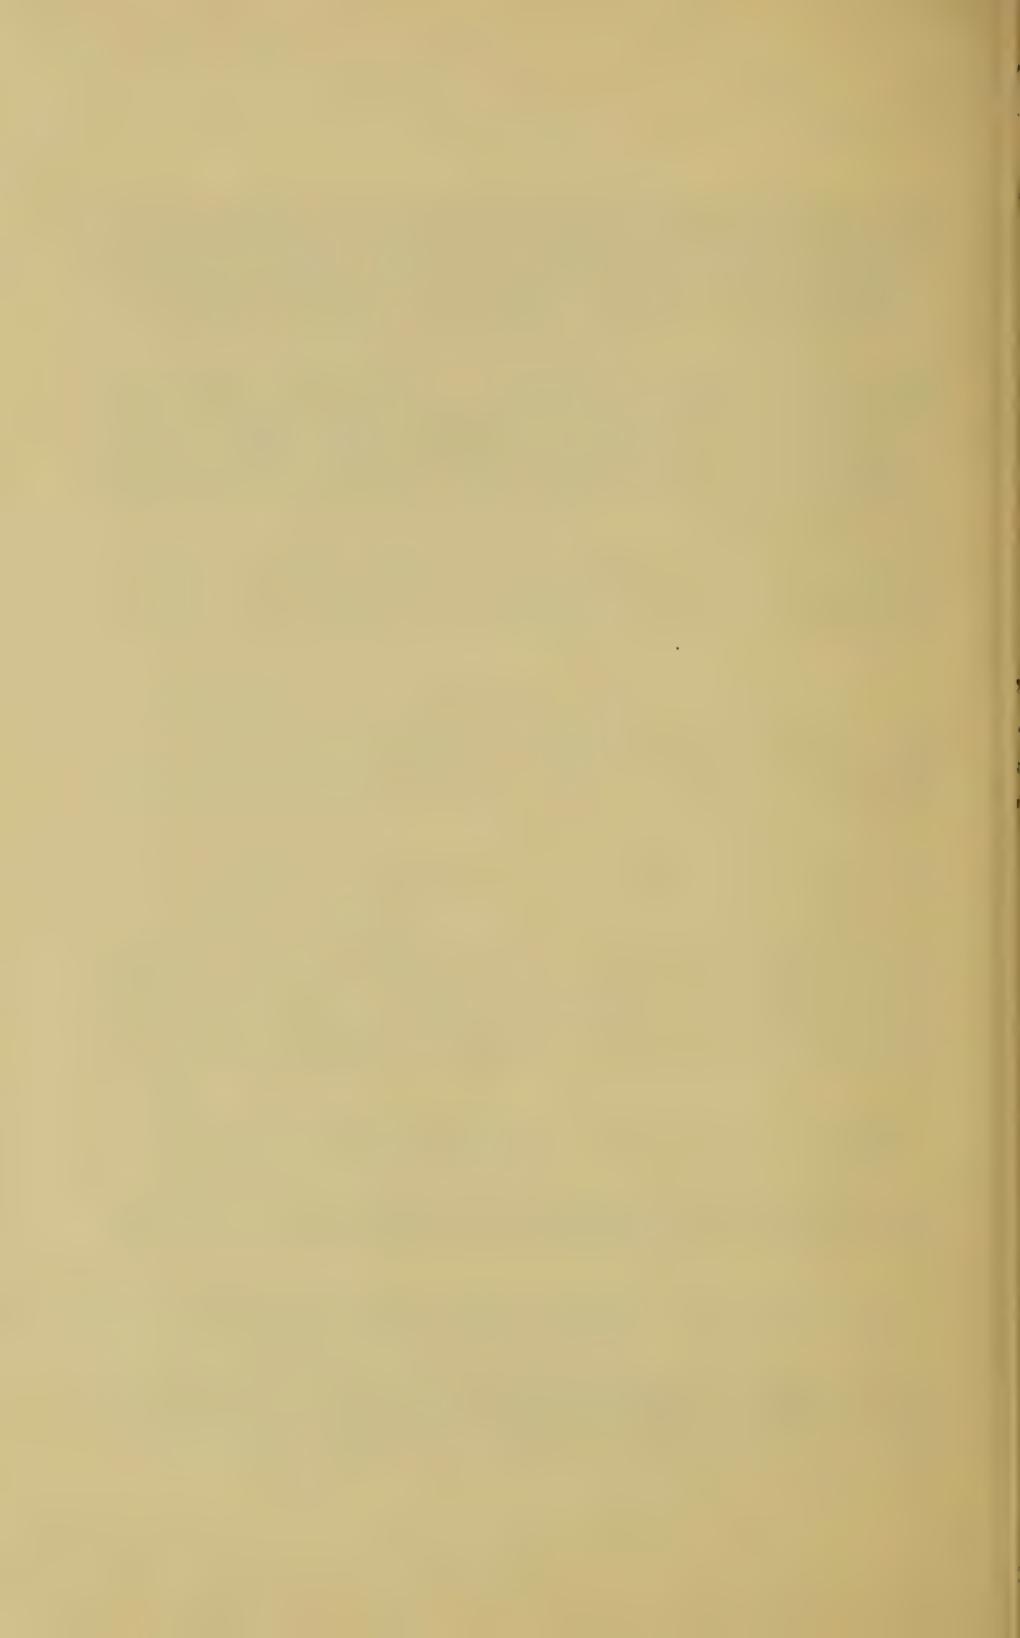

**(53) KINELLAR NORTH STAR (4630)—sire, Gallant Marshal; dam, Kinellar Buttercup 3rd by Cruggleton Bonn.**

His dam, Kinellar Buttercup 3rd, is also the dam of Kinellar Buttercup 11th, who, in 1957 and 1958, gained nine 1st prizes, two championships, and three reserve championships.

**(54) CALROSSIE TRIUMPHANT (2325), white—sire, Calrossie Welcome; dam, Calrossie Flossy Beau by Kirkton Baronet.**

Calrossie Triumphant was sold at Perth in 1955 for 5200 guineas. He had an unbeaten record in the showyard in 1958, having been champion at the Royal Highland, Royal English, and Great Yorkshire Shows. He is a full brother to Calrossie Constellation, the unbeaten bull in 1957.

- (55) BEAUFORT CAUTION (6069) won 2nd prize in his class at Perth in 1957, and was bought for the Shirkarton Herd at 1800 guineas. He won 1st prize in his class at the Royal Highland Show at Dundee in 1957, and 1st prize in his class at the Royal English Show at Norwich in 1957. He is the sire of Shirkarton Ranger, 2nd prize winner in the late-January class at Perth in 1959, and sold for 1000 guineas to Mr. Gilbert Elkin, North Dakota, U.S.A.
- (56) BLACKTON BERTIE (13730), red, is by Chapelton Waverley, and his dam is by Chapelton Clansman, both sons of Cruggleton Balmoral. Blackton Bertie was reserve champion at Inverness Bull Sale, but was withdrawn for use in the herd. His dam, Blackton Flora Broadhooks, was shown at four shows as a heifer, and took 1st prize every time, and was reserve female champion at Ellon.
